

1. OpenAI-GPT- 5.5

Release Date: April 23, 2026

Cut Off Date: Approx. Nov 2025

Context window: 1M-token API.

Cost: ~\$2/M input, \$8/M output.

When to use : Complex professional work, agentic coding , scientific research.

2. Anthropic -Claude opus 4.7

Release date: April 16, 2026

Cut of date: Early 2026.

Context Window: 200000+ tokens

Cost: 1~5\$/M input , \$75M/output.

When to use: Deep reasoning, top tier coding, high stakes autonomous planning.

3. Google DeepMind- Gemini 3.1 Flash-lite

Release Date: March 2026.

Cut of date: Early 2026.

Context window: 1M+ tokens.

Cost: <\$0.15/M input, <0.60/M Output.

When to use: High throughput production API's,

Real-time applications requiring sub-50ms latency and high efficiency tasks.

4. xAI-Grok 4.3 Beta

Release date: April 17, 2026

Cut off date: Real time

Context window: claimed 2m tokens.

Cost: ~\$2M/input, \$15/M output.

When to use: factual accuracy tasks, real time social media analysis
And uncensored/creative writing.

5. Alibaba Cloud -Qwen Team-qwen 3.6-27B

Release date: April 20, 2026

Cut of date: Early 2026.
Context window: 256,000+ tokens.
Cost: open source
When to use: high performance coding, multi modal reasoning tasks,
And often beats much larger models.

6. Mistral AI-Mistral medium 3.5

Release date: April 30, 2026.
Cut off date: Early 2026
Context window: 256k tokens.
Cost: Open source/Api
When to use: European based complaint applications, multilingual text generation
And fast, dense model reasoning.

7. Meta-Llama (Maverick/scout)

Release Date: April 2025 initial release
Cut off date: Early 2026
Context window: upto 10M tokens.
Cost: OpenSource (Self-host)
When to use: Massive context needs, custom fine tuning,
And on-premise infrastructure development.

8. Deepseek-V4-Pro

Release date: April 23, 2026
Cut off date: Early 2026
Context window: 1M tokens
Cost: Extremely low cost (MIT License)
When to use: Cost sensitive production, general chat, story writing
And often matching expensive proprietary models.

9. Zhipu AI-GLM-5.1

Release date: Early 2026
Cut of date: 2026
Context view: large.
Cost: competitive (Open/Api).
When to use: Agentic workflow, complex coding and specialized reasoning

tasks,

Heavily favored in Chinese developer market.

10. Moonshot AI-Kimi K2.6

Release date: April 19, 2026

Cut off date: 2026

Context window: large

Cost: Open/Api

When to use: long- context understanding, 12/hr coding session and specialized agents tasks.
